The English meaning of **Rodriguez** is Son of Rodrigo. In Spanish, the use of the suffix "ez" which means "the son of", is very common.

The surname **Rodriguez** is a patronymic name, which means that it is derived from a man's given name, usually a father, paternal ancestor or patron.

There are many indicators that the name **Rodriguez** may be of Jewish origin, emanating from the Jewish communities of Spain and Portugal.

When the Romans conquered the Jewish nation in 70 CE, much of the Jewish population was sent into exile throughout the Roman Empire. Many were sent to the Iberian Peninsula. The approximately 750,000 Jews living in Spain in the year 1492 were banished from the country by royal decree of Ferdinand and Isabella. The Jews of Portugal, were banished several years later. Reprieve from the banishment decrees was promised to those Jews who converted to Catholicism. Though some converted by choice, most of these New-Christian converts were called CONVERSOS or MARRANOS (a derogatory term for converts meaning pigs in Spanish), ANUSIM (meaning "coerced ones" in Hebrew) and CRYPTO-JEWS, as they secretly continued to practice the tenets of the Jewish faith.

Our research has found that the family name **Rodriguez** is cited with respect to Jews & Crypto-Jews in at least 86 bibliographical, documentary, or electronic references:

A History of the Marranos, by Cecil Roth.

|

The expulsion of the Jews from Spain in 1492 by the infamous decree of King Ferdinand and Queen Isabella was the culmination of a series of anti-Jewish persecutions throughout the 14th and 15th centuries in which thousands of Jews were massacred. Thousands of others converted in order to escape death. After the expulsion many more joined the ranks of these "new Christians" as an alternative to exile. A large number of converts, while outwardly professing Christianity, secretly continued to practice Judaism. These Marranos, as they were popularly known, were then mercilessly persecuted by the dreaded Inquisition which through tortures of forced confessions and auto-da-fes sent thousands to the stake. Many others managed to escape to countries outside the reach of the Inquisition where they created a widespread Marrano diaspora. Thousands of Marranos have survived even into our times. This seminal work by the eminent historian traces the tribulation of these secret Judaizers as well as the fate of those who succeeded in escaping to other lands where many of them rose to prominence in various fields of endeavor.

The Jews of the Balkans, The Judeo-Spanish Community , 15th to 20th Centuries, by Esther Benbassa and Aron Rodrigue |

This volume is a history of the Sephardi diaspora in the Balkans. The two principal axes of the study are the formation and features of the Judeo-Spanish culture area in South-Eastern Europe and around the Aegean littoral, and the disintegration of this community in the modern period. The great majority of the Jews expelled from Spain in 1492 eventually went to the Ottoman Empire. With their command of Western trades and skills, they represented a new economic force in the Levant. In the Ottoman Balkans, the Jews came to reconstitute the bases of their existence in the semi-autonomous spheres allowed to them by their new rulers. This segment of the Jewish diaspora came to form a certain unity, based on a commonality of the Judeo-Spanish language, culture and communal life. The changing geopolitics of the Balkans and the growth of European influence in the 19th century inaugurated a period of westernization. European influence manifested itself in the realm of education, especially in the French education, dispensed in the schools of the Alliance Israelite Universelle with its headquarters in Paris. Other European cultures and languages came to the scene through similar means. Cultural movements such as the Jewish Enlightenment (haskalah) also came to exert a distinct influence, hence building bridges between the Ashkenazi and Sephardi worlds

Sangre Judia (Jewish Blood) by Pere Bonnin. Flor de Viento, Barcelona, 2006. A list of 3,500 names used by Jews, or assigned to Jews by the Holy Office (la Santo Oficio) of Spain. The list is a result of a census of Jewish communities of Spain by the Catholic Church and as found in Inquisition records. |

Pere Bonnin, a philosopher, journalist and writer from Sa Pobla (Mallorca), a descendant of converted Jews, settles with this work a debt "owed to his ancestors", in his own words. The book, written in a personal and accessible style and based on numerous sources, includes a review of basic Jewish concepts, Jewish history in Spain, and Christian Anti-Semitism. There is also a section that focuses on the reconciliation between the Church and Monarchy and the Jews, which took place in the 20th Century. In this study, Bonnin deals in depth with the issue of surnames of Jewish origin. In the prologue, the author explains the rules he followed in the phonetic transcription of surnames of Hebrew origin that are mentioned in the book. The researcher cites the Jewish origin, sometimes recognized and other times controversial, of historically prominent figures (like Cristobal Colon, Hernan Cortes, Miguel de Cervantes Saavedra and many others) and links

between surnames of Jewish origin with some concepts in Judaism.. The book also includes an appendix with more than three thousands surnames "suspected" of being Jewish, because they appear in censuses of the Jewish communities and on the Inquisitorial lists of suspected practitioners of Judaism, as well as in other sources. In the chapter "Una historia de desencuentro", the author elaborates on surnames of Jewish origin of the royalty, nobility, aristocracy, clergy, and also of writers, educators and university teachers during the Inquisition. Special attention is given to the "Chuetas" of Mallorca, the birthplace of the author.

Based on the Inquisition's records, it is a portrait of the Conversos' deep yearning for their Jewish past and the ultimate sacrifice they were prepared to offer for their continued adherence to their ancestral faith.

Apellidos de Judios Sefardies (Surnames of the Sephardic Jews) from the site Comunidad Judia Del Principado de Asturias |

The Principality of Asturias (Spanish: Principado de Asturias - Asturian: Principáu d'Asturies) is an autonomous community within the kingdom of Spain, former Kingdom of Asturias in the Middle Ages. It is situated on the Spanish North coast facing the Cantabrian Sea (Mar Cantábrico, the Spanish name for the Bay of Biscay). The most important cities are the provincial capital, Oviedo, the seaport and largest city Gijón, and the industrial town of Avilés. No one knows the exact date at which Jews arrived in Asturias. Based solely on the documentation found so far in Asturias, there are clear references to the mid-eleventh century Council of Coyanza held in the Diocese of Oviedo in 1050 which states in Chapter VI: "... no Christian shall live in the same house with Jews or eat with them; if anyone infringes our constitution, they shall do penance for seven days, and if not willing to do it, being a noble person, they shall be deprived of communion for a full year, and if an inferior person they will receive a hundred lashes." But it is in the twelfth century when the rise and importance of the Jewish people is more noticeable in this region. Jewish witness signatures begin to appear more often on donation pledge cards from 1133. Asturias names are not very common among the Jewish population in other parts of the peninsula around the same time, perhaps causing confusion.

Events of these periods forced this community to emigrate to America.

List of the Interior Ministry -Sepharadic Community of Chile, Chile, 1999. |

Several of the very first explorers to Chile were accompanied by Conversos. Legend maintains that the very first explorer in 1535, Diego de Almagro, came with a Converso by the name of Rodrigo de Orgonos. Five years later, Pedro de Valdivia, another conquistador, came with Diego Garcia de Caceres of Plasencia, Spain, who is also believed to have been a Converso. Scandals erupted in 1621 after the genealogy of Caceres was traced to include many prominent families in Santiago, including the founder of the Chilean independence movement, General José Miguel Carrera. Caceres' family roots were published in a pamphlet entitled La Ovandina, but the arrival of the Inquisition at that time forbade the circulation of the pamphlet, which was reprinted in 1915. The court of the Inquisition established in Lima in 1570 also had authority over what is now Chile, and

the first auto-de-fé was held shortly afterward. Nevertheless, the Crypto-Jewish settlement in this relatively remote outpost of the Spanish Empire continued to grow. The persecution of Conversos ceased when the country gained formal independence from Spain in 1818. Jews have achieved prominent positions in the Chilean government and other realms of influence, and have played a key part in the founding of the country, both before and after its independence in 1818

Jews in Colonial Brazil, by Arnold Wiznitzer |

Professor Wiznitzer gathered detailed information about individual Jewish settlers in colonial Brazil and about cases where they were brought before the Inquisition at Lisbon, and his study throws new light on some phases of Brazilian colonial history. Many Jews fled to Brazil and others were deported to the colony as convicted heretics after the King of Portugal attempted to compel all of his Jewish subjects to accept Christianity in 1497. They were active in the establishment of the sugar industry and in trade, and they maintained close relations with another large group of exiles who had taken refuge in Amsterdam. Most of the "new Christians" continued to practice the old religion secretly.

Secrecy and Deceit | The Religion of the Crypto-Jews, by David Gitlitz

Despite the increased attention given to Hispano-Jewish topics, and the "conversos" or Crypto-Jews in particular, this is the first thorough compilation of their customs and practices. The author has culled from Inquisition documents and other sources to paint a portrait of the richness and diversity of Crypto-Jewish practices in Spain, Portugal, and the New World. The history of Spanish Jews, or Sephardim, stretches back to biblical times. The Jews of Spain and Portugal made formative contributions to all Hispanic cultures, the impact of which is first being measured and recognized today. The Sephardim experienced a Golden Age in Iberia between 900-1100, during which they acted as the intermediaries between the rival political and cultural worlds of Islam and Christianity. This Golden Age ended with the Reconquest of Spain by Catholic overlords, though for another 300 years the Jews continued to contribute to Iberian life. In 1391 and again in 1492, intense and violent social pressures were put upon the Jews to join the larger Christian community. Many Jews converted, often unwillingly. In 1492 the remaining Jews were exiled from Spain. The converted Jews (Conversos) became an underclass in Spanish society. Many of them clung tenaciously to Jewish practices in the face of torture and death at the hands of the Inquisition. Having lost contact with other Jews, these people developed a religion which was an admixture of Catholic and Jewish rituals. David Gitlitz examines these practices in detail and attempts to answer the question of whether the Conversos were in fact Jewish. Gitlitz's research is exhaustive. He has combed through thousands of Inquisition records, showing that a sense of "Jewishness" if not Jewish practice remained a core value of many Spaniards' lives well into the 1700s. Gitlitz is convincing in showing that the Inquisition unwittingly aided crypto-Jews in perpetuating themselves by publishing Edicts of Faith. Essentially checklists for informers, they described the behavior of "Judaizers" (sometimes the practices listed were absurd or simply erroneous). These, ironically, were used by Judaizers as guides to religious behavior. It is revealing that as the Inquisition faded, crypto-Judaism waned, though never totally vanished. Gitlitz's knowledge and research on the subject is encyclopedic. The book is written in a "textbook" style which makes it somewhat technical and dry, though it is enlivened by excerpts from Inquisition records, which Gitlitz has apparently chosen for their interest, irony, unintended comedy, or spiritedness. It is difficult to imagine that human beings would face the tortures of the rack for not eating pork. That these same tortured people could summon the will to laugh at their executioners is something wondrous. The book includes the names of the Sephardim (and sometimes their residences too).

This is an historical archaeological examination of a 17th- and 18th-century Jewish community on the island of Nevis in the British West Indies. Unlike earlier archaeological studies of the Jewish Caribbean Diaspora that focused on single sites, the focus of this investigation was on increasing the understanding of the roles and lives of the Sephardim in the colonial Caribbean. The study of the Nevis community indicates that the Jews of the Caribbean were not fully integrated socially or politically into British colonial society.

The Jews of Jamaica, by Richard D. Barnett and Philip Wright. Oron Yoffe, Ben-Zvi Institute, Jerusalem, 1997. |

The product of many years of painstaking research by two late scholars, Richard D. Barnett and Philip Wright, this volume presents the texts or summaries of 1456 tombstone inscriptions of Jews who lived in Jamaica between 1663, when the British ousted the Spanish, and 1880, when systematic registration of deaths was introduced. Jewish families who had fled the Inquisition in Spain and Portugal settled in Jamaica in increasing numbers during that time. Ashkenazic Jews also settled there in the eighteenth century. The Jews played a significant part in developing the island's natural resources and its international trade. Featuring detailed indexes by name, date and language, *The Jews of Jamaica* is a valuable tool for the study of immigration to the Americas, the surnames, given names and genealogy of Sephardi Jews. The texts of the inscriptions, many of them in three languages (Hebrew, English and Portuguese or Spanish), are of cultural interest and sometimes refer to dramatic events in the lives of the Jewish residents of Jamaica during a turbulent period.

In Sure Dwellings | A Journey From Expulsion to Assimilation, by Margot F.

Salom

In 1492, the last professing Jews in Spain were driven out of their beloved Sepharad where they had formerly been accepted as an important part of a thriving, pluralistic society for seven centuries of Islamic rule. The Christian Reconquista in the last of those centuries, spelt the beginning of the end for the Jews of Spain as well as for the convivencia (cooperation) that had long existed between Jew, Muslim and Christian in what has been called the "Golden Age". Many of the expelled Spanish Jews spread out around the surrounding Muslim lands where they found some refuge. Others found a brief hiatus of safety in Portugal. Decades later many of the expelled Jews travelled to the mercantile centres of the Mediterranean, northern Europe and the New World where they participated in the burgeoning trading empires of Holland, England and Italy. It is this fascinating history that the author has attempted to trace, using her ancestors as a paradigm. Realizing that this narrative of the western Sephardim is all but forgotten with the secularisation of a resolute assimilation process, she has written a story that both describes the history of the countries of her ancestors' settlement as well as her personal search through many of the lands of their diaspora, in an attempt to establish the journey of her ancestors as they travelled from fifteenth century Spain to nineteenth century Australia. It was in Australia that this lineage finally became established in a land of "sure dwellings" and where the inevitable outcome of assimilation was the loss of an ancient faith - a loss that has created the primary impetus for the telling of this story

Antonio Alberto Banha de Andrade. Judeus em Montemor-o-Novo,(Jews in Montemor-o-Novo) Portugal, Academia Portuguesa de Histôria, 1977. |

Jewish settlement in the area began prior to Portugal's emergence as a nation. A tradition among the Sephardi Jews ascribes their arrival in Iberia to Roman times, in the wake of the destruction of the Temple in 70 C.E. and subsequent dispersion toward Europe. The existence of a significant Jewish settlement on the peninsula by 300 C.E. is apparent from the edicts of Elvira which proscribe "taking food with the Jews" and single out the Jewish group in a number of dicta. James Finn endeavored to make a case for dating the initial

Jewish involvement in the area as early as 900 B.C.E., based on reports of two ancient Hebrew inscriptions, one mentioning Amaziah, King of Judah, and a second marking the grave of King Solomon's treasurer, Adoniram. When Portugal emerged as a distinct national entity under Affonso (Henriques) I (1139-85), a number of Jewish centers existed, including a community in Montemor-o-Novo. The author of this work, Antonio Alberto Banha de Andrade, was born in 1915 in Montemor-o-Novo and was a renowned Portuguese historian and teacher who did important work in the fields of religious history, education and culture.

The author, Anita Novinsky, holds degrees in philosophy and history from the University of Sao Paulo and is also affiliated with several foreign institutions and institutions in Europe and the U.S. She published several books that have greatly contributed to a renewed vision of the Inquisition in Brazil and Portugal. According to a survey completed in 1994 by Professor Francisco Bethencourt (New University of Lisbon), the total number of accused put on trial by the Inquisition amounted to 44,817. Of these, 9,726 were charged by the Inquisition of Lisbon (the other courts were located in Evora, Coimbra and Goa). About half of these prisoners, approximately five thousand, were in Brazil. In this work, which was a meticulous and patient work of years, the author has identified 1,076 prisoners from Brazil, including a wide range of details (place of birth, address, ethnic backgrounds, occupations, crimes and sentences), giving this study high importance.

Luiz de Bivar Guerra. Inventory of the proceedings of the Inquisition of Coimbra(1541-1820), Lisbon, 1972. |

Coimbra was the seat of an inquisitional tribunal, one of the four operating in Portuguese territory, besides Lisbon, Évora, and Goa. The tribunal in Coimbra, which tried many distinguished Conversos, disposed of more than 11,000 cases between 1541 and 1820. The trials sometimes lasted for months or even years, during which the accused were held in prison. The accused came in great numbers from Bragança, Braga, Porto, Viseu, Aveiro, Guarda, and Coimbra. From the sermons preached at the auto-da-fé we learn that mothers and grandmothers were held responsible for maintaining Jewish practices and beliefs among the Conversos. Thus, during the first century of its existence, more women than men were tried by the Inquisition of Coimbra. The hardest hit were those who lived in distant and mountainous areas. As late as June 17, 1718, over 60 secret Jews appeared at an auto-da-fé there, some for a fifth or sixth time. Two were burned at the stake and the rest

penanced.

Maria Antonieta Garcia. Os Judeus de Belmonte. Os Caminhos da Memória (The Jews of Belmonte | The Paths of Memory) Lisbon, 1993.

Maria Antonieta Garcia is the wife of the Ex-Mayor of Belmonte whose term of office lasted for more than eleven years during the 1980s (though they were from another town in the area, where they live). This was a fateful period in the life of the local Marrano-families, precisely when the young people initiated the return to the bosom of normative Judaism. It must be said that this process was assisted both by the Town-Council and personally, by the Mayor. Thus it happened that the Mayor's wife, Dr. Antonieta Garcia, began to look closely at the lives of these families, observation that soon became a mentored scholarly research for the purpose of writing a dissertation. However, Garcia knew a great deal about Marranism even before her research into the Crypto-Jews of Belmonte, since she herself stemmed from Marrano roots, and the subjects of her research knew her as such. Hence, in their eyes she was not an outside observer but "one of them".

In the sixteenth century, many Jews made their way from the Iberian Peninsula to Brazil to

escape the Inquisition. With the arrival of the Dutch in Pernambuco, and in particular the presence of Count Maurice of Nassau, the Jewish immigrants were able to enjoy great freedom to practice their religion and traditions. Settling in the state, they built schools, synagogues, and cemeteries. No one knows the exact size of the Jewish population that came to the Northeast of the country, but researchers estimate that during the Dutch rule (1630-1654), about three hundred Jews lived in Recife.

It is likely that a Jewish community existed in the Tuscany region dating back to the Roman era at least in Florence. The first reliable data comes from Benjamin of Tudela who found Jews in Pisa and in Lucca (c. 1159). There were Jews in Siena by 1229. Jews presumably engaged in moneylending in Tuscany in the 13th century. This book traces the history of the Jews in this area, highlighting the most important facts and people, including the connection with the House of Medici.

This book contains a table with the names of the Jews invited to take part in the Grand Sanhedrin (a High Court of Ancient Israel), revived by the French emperor, between February 9 and March 9, 1807. The purpose of this meeting, called the Assembly of Jewish Notables, was to clarify doubts about all aspects of Jewish religious and political life within the parameters laid down by Biblical and Rabbinic tradition. It was composed of 71 Jews, recruited in the French Empire and the Kingdom of Italy, two thirds were rabbis and other men of law. Under the leadership of David Sintzheim, the Chief Rabbi of Strasbourg, the Grand Sanhedrin ratified the proposals put before it by Napoleon that specified the distinction between religious and political laws. This study presents a largely favorable account of Napoleon's Jewish policies, although some other scholars have different views on this.

The Iconography of Tombstones represent a recently recognized yet still largely neglected source for unraveling the historical past. Cemetery and gravestone study is increasingly multi-disciplinary, involving the arts, humanities, and social sciences, and while studies date back more than 100 years, it is still an emerging field. The investigation of Jewish sepulchres also commenced in the second half of the nineteenth century. The destruction of Jewish cemeteries through the ages, which has obliterated many ancestral records and monuments has also contributed to this scholarly neglect.

Several thousand "New Christians" (the descendants of Portuguese Jews who had been forcibly converted some two centuries before) emigrated to Amsterdam in the 17th century. Subsequently the community decided to re-manifest themselves as Jews. The author focuses on the social dimension of Jewish economic and religious life, formal and informal, as well as their interactions with the Dutch authorities and populace (an exceptionally cordial relationship for that time). Also explored is the contradictions that arose from Jews that often retained, sometimes without realizing it, Catholic ideas and views.

ETSI, Volume 4, No.12 dated March 2001, "Aliases in Amsterdam", by Viberke Sealtiel-Olsen, a list of alias names used by Sephardim in Amsterdam. True Sephardic Name=Alias Name |

When the Conversos fled Portugal to settle in Amsterdam they returned openly to Judaism. Because they often still had relatives in Portugal, they tried to protect them by using aliases in their transactions. However, it wasn't only the Portuguese who wound up in Amsterdam. Even a century after 1492, conversos were finding their way from Spain to Amsterdam. Listing a person as a Portuguese merchant generally meant he was Jewish. Their family contacts worldwide, along with their language skills, were great commercial assets in their farflung business ventures. And in their contacts with family back home, they had to be discreet as to not bring suspicion on relatives left behind. This work is a wonderful research tool for Sephardic research in Amsterdam.

Around the 12th century, surnames started to become common in Iberia. In Spain, where Arab-Jewish influence was significant, these new names retained their old original structure, so that many of the Jewish surnames were of Hebrew derivation. Others were

directly related to geographical locations and were acquired due to the forced wanderings caused by exile and persecution. Other family names were a result of conversion, when the family accepted the name of their Christian sponsor. In many cases, the Portuguese Jews bear surnames of pure Iberian/Christian origin. Many names have been changed in the course of migration from country to country. In yet other cases "aliases", or totally new names, were adopted due to fear of persecution by the Inquisition.

Some interesting facts about the name this name are :

- In the 2000 census, **Rodriguez** was the ninth most common surname in the United States, making it probably the first time in U.S. history that a non-Anglo name ranked among the 10 most common surnames.
- The name Rodrigues appears in the records of the Inquisition in Lisbon, Evora, Coimbra and in the Sinedrio napoleonico
- In the "Book of the Guilties", the name RODRIGUES, appears among the Brazilians 137 times. The name originated in 'Rodrigo' but may also have a Spanish origin. It appeared in Portugal around the 14th and 15th centuries, but there were many Rodrigues also among the Jews who, at the end of the 16th and the beginning of the 17th century, emigrated from Spain to Portugal, although there may not be any blood links between them. We know the curious case of Abin Rodrigues, in Spain, that remains popular in history; he was at the same time a Jew, a Christian and a Moslem
- Rodrigues is a Sephardic family that is said to have emigrated with the Gradis family from Palestine at the time of Bar Kochba's insurrection (135 C.E.) and settled first in Portugal and later in Spain. Many Jews with the name Rodriguez were martyred by the Spanish Inquisition in the 17th and 18th centuries.
